Resume

I'm starting my career in the Front-end development area, looking to acquire and improve skills.
In May 2023 I started a course in Brazil, called Elas na tech, aimed at teaching technology to women. In this course I had the opportunity to develop projects and gain experience in HTML, CSS and JavaScript, as well as in the version control system (Git). I have a Web Development course on the IBM Skills Build Platform. And I also have basic knowledge of Bootstrap, React.js, Sass and Responsive design.

Experience

Request the full version of my CV via email.
